

# Office The Best Chair for Bad Backs Discover SwingChair

## The SwingChair Secret

### Back Support + Motion

SwingChair is a dramatic breakthrough in seating comfort that actually helps you control your back pain! SwingChair's seat and backrest automatically adjust their positions to perfectly support you from the moment you sit down and every time you move. SwingChair is the only chair that actually responds to your natural movement while providing full back support.

### Why Motion is Essential for Comfort and Relief

Your body abhors static positions and craves motion because motion helps supply your back, disks, muscles, and ligaments with blood and nutrients, keeping them healthy, comfortable, and relaxed. The smooth, gliding motion provided by SwingChair's unique design makes all the difference in the world in how you'll feel after a day's work.

### How SwingChair Works

Unlike your current chair which locks out all motion like a straight-jacket and forces you to sit a certain way, SwingChair gives you freedom of movement while supporting your back. Reach forward to grab the phone, lean back to talk, sit up to work at your keyboard, SwingChair perfectly supports this full range of motion. Most importantly, it comfortably supports your back better than any other chair on the market. Because SwingChair dynamically adjusts to you, you'll never have to fuss with levers and complicated controls.

*"After 30 years of running, 20 years of weight training and 56 years of age, I have level five severe lumbar degenerative disc disease with multiple ruptured discs. The SwingChair makes me comfortable and relieves pain."*

*-Jon Sterngold, MD*

*"Everyone is enjoying their new chairs. Thanks for making such an incredibly comfortable ergonomic chair available at such a surprisingly affordable price. We highly recommend the product and the company to anyone seeking the best chair for bad backs."*

*-Mary Jacobs, Office Manager  
FineLine Graphics & Design, Inc.*

### A Great Office Chair

Even if you don't have back pain, you'll be surprised at how good it feels to sit in a chair that responds to you. Many SwingChair customers report that they are more productive and comfortable after working while sitting on a SwingChair compared to an ordinary office chair. It looks great and is built to give years and years of service.

### Skeptical if SwingChair will Work on Your Bad Back?

It's only natural to be skeptical about relieving your stubborn back pain. After all, a bad back is one of the most persistent and hard-to-fix problems people face. That's why SmartMotion offers a **90 Day Money Back Guarantee** on the SwingChair. Use it for 90 days, 3 entire months, and if your SwingChair hasn't dramatically improved your comfort and reduced your back pain to your satisfaction, we will buy it back at your full purchase price, including shipping and handling. That's how much confidence we have that SwingChair will work for you and your bad back.

*Thousands of  
satisfied customers!*

*Looks like a  
typical office chair..  
performs like no other!*
